Optimizing Building Performance Through Proven Energy Solutions

Energy expenses have risen considerably in the last several years—and will likely continue to rise—impacting the bottom lines of businesses. EMCOR Services Aircond can help curb rising energy costs by developing a customized energy-management strategy to help your facility achieve significant energy-cost reductions.

Through our team of dedicated experts, we offer a full suite of integrated energy services, from strategy and implementation to financing and maintenance—all delivered with our distinctive blend of leadership, quality and technical training, and safety priorities. Aircond's in-house professionals serve as your trusted advisors in the rapidly changing utilities environment, helping you navigate gas, electricity, water, and even equipment maintenance considerations, so that you can focus on your business.

Custom Energy Solution Implementation Strategies

Our expert team is well-versed in the various techniques that can be used to reduce operating expenses while improving day-to-day employee satisfaction and productivity levels in a facility. We will prepare a summary of suggested implementation strategies that will help reduce annual utility consumption and operating expenses. We will then work with you to prioritize those strategies to optimize the financial results and performance of your operation.

Our energy management services include:

- » Technical and economic evaluations of concepts and existing systems
- » Site investigations
- » Research into local energy codes
- » Energy audits to evaluate costs and energy use
- » Pre-construction services to achieve green buildings

Minimize Your Energy Spend. Maximize Your Energy Savings.

In addition to our energy management services, we offer energy consulting and third-party financing to help you maximize every dollar spent. We can assist in providing financing for capital improvements and system upgrades. Aircond specializes in sourcing the appropriate financial products to match your business needs. From buying energy to system selection and funding, we help make energy work for you.

Achieving Peak Performance Through Preventive Maintenance

After we optimize and implement the recommended energy saving opportunities, we can work with you to create and deploy a thorough and successful maintenance program. We can help you stay abreast of industry standards and best-practice energy management systems, while helping to keep your facilities operating optimally for years to come.
