OPERATIONS &
MAINTENANCE

Industry-Leading Single-Source Facilities Management Services

As a single-source provider of operations and maintenance (O&M) services, EMCOR Services Aircond has the people, processes, and technology required to self-perform a full range of facilities management tasks, from building maintenance to construction management to landscaping and everything in between.

Our distinctive blend of leadership, quality and technical training, and safety priorities results in **world-class customer service aimed at meeting each client's unique building management and financial objectives responsively, reliably, and cost-effectively.**

Professionally Executed Occupied-Space Renovations with Minimal Disruption

Aircond's occupied-space renovation capabilities are on the cutting edge of facilities management services. Our highly skilled workforce has the experience necessary to work quickly, efficiently, and unobtrusively in today's busy environments. The result is facilities renovated and maintained with minimal disruption to daily operations.

An Expert Approach to Measuring, Monitoring, and Managing Your Facility

We take a results-oriented approach to operations and maintenance, designing each program according to the unique needs of your facility and weighing outsourcing options according to need. We start with an in-depth due diligence analysis that determines potential value-added areas. We then design a customized facilities management services solution that integrates our people, processes, and technologies and matches your budget to your objectives. Throughout this process, Aircond focuses on providing maximum value via fundamental preventive maintenance solutions.

Best-In-Class Implementation

Aircond's implementation strategy is goal-oriented and focused on end-to-end success for your facility. We specify task accountability and design informative reporting tools that help maximize the potential for continuous improvement, all while delivering superior service. The result is a complete package of O&M services that offers real solutions that work.
